Homework Cycle Example

Homework Cycle Example - Maths Department

Homework is relevant Before homework is set

Questions	Actions	Notes and tips
Content How and when will teachers check the contents of homework?	Teachers check that the topics due to be set are relevant to what they taught and amend if needed	 Use the Planned homework emails as a reminder Use 3 topics for a 60 minute homework
☐ Timing How will you ensure students see topics <i>after</i> they have been taught?	Schemes of Learning are built to run at least a week behind class learning	When building SoLs put the topics at least a week after they are due to be taught in class so students are sure to see them after learning about them
☐ Starting level What starting level will you set for each class?	Choose a starting level for the class that is suitable for the lower attaining students	 Set the Initial homework difficulty level at a level that means all students can access the work from the beginning Remember to explain to students that the homework will adjust as they work

Students are supported Whilst homework is set

Questions	Actions	Notes and tips
☐ In lessons How will teachers provide support to students in lessons?	Teachers monitor the Hand in and Insights pages and use the data and alerts, to support students in every lesson	 Share the Summary view with the class, including Shout Outs Look for students who have an alert but are still stuck Use Presentation View on the Insights page as a class starter or activity
☐ Form tutors How could you utilise form tutors?	A member of the department shares completion information with form tutors so they can support their classes before the hand in day	Filter the homework completion reports by registration class and send to form tutors
□ Whole school What other whole school approaches would help?	The school provides access to devices and a weekly lunchtime or after school club	Clubs don't need to be run by maths specialists

Return to overview

Success is recognised During, and after homework is due

Questions	Actions	Notes and tips
☐ In lessons How will teachers use Sparx data to praise & reward during lesson?	Teachers use the Hand in page in every lesson to identify students to praise and reward	The Hand in summary is a good source of information that could be used to reward students
☐ In the department What activities can be carried out at a department level?	The Sparx Leader/HoD use Sparx data to share successes within the department	 Use level up data on the Department Dashboard to plan who to reward Display information about successes in the maths department
☐ Whole school How can students be recognised in the wider school community?	A member of the department gathers information to share regularly in assemblies	For more tips look at: Creating a Homework Rewards System

Return to overview

Consequences are clear After homework is due

Questions	Actions	Notes and tips
☐ Consequences What happens if homework isn't complete by the deadline?	Students who don't complete their homework by the due date finish it in an after school club	 Turn parent emails on Have a day between homework due date and the next hand out for catching up Make sure students know how to get help before the due date Avoid ambiguity for your students by setting your completion target at 100%
Responsibility Who is responsible for following up on the consequences set?	A member of the department checks homework completion on the due day and informs students if they must go to a detention	For more tips look at: Creating a Homework Rewards System

Homework cycle - Parents

Catch-Up Club

Students who have struggled to reach 100% may be offered a school catch up club to ensure they do not create any gaps in their learning

At-Home Support

Provide a quiet space. Encourage good book work, finishing early and using videos first for help

Homework Set

Teachers ensure the new topics in homework have been recently covered in lessons

In-School Support

Teachers will offer school support, this could be in the form of Sparx Club or in-lesson support

In-Sparx Support

Support Videos with every question. Features like "Seek Help" so the teacher can see when they are struggling

Homework Content

Homework is pitched at your child's current working level, meaning they should be able to complete their maths homework independently
